Give your clients the platinum treatment with Canada's most requested facial service and our 7-in-1 Luminous Multi-Facial

The Luminous 7-in-1 Multi-Facial Skin System

Hydrodermabrasion (or Hydradermabrasion) ex-foliates by sloughing off the top layer of dull skin, which in turn ramps up collagen production. Results vary but your clients can expect to see improvements in both their skin tone and texture including:

- Fresher-looking skin
- Minimized fine lines
- Smoother skin
- Reduced hyperpigmentation
- Minimized pores
- Reduced age spots
- Faded scars
- Firmer, tighter skin
- Cleaner-looking skin
- More radiant complexion
- Rejuvenated appearance

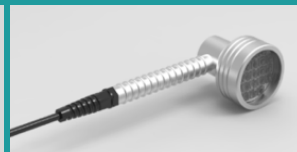

Hydro dermabrasion uses water and oxygen to gently exfoliate without the use of hard crystals or abrasive wands.

The vacuum pen uses 3 sized tips to suction blackheads from the pores.

High frequency electrode produces a mild current and coloured light.

The Photon Light applies low energy and a unique optical technology for skin care.

The Skin Scrubber provides gentle exfoliation through vibration.

Oxygen Spray Treatment supplies nutrients and moisture to the skin rapidly.

Diamond Dermabrasion handles uses a diamond head to abrade the skin and then vacuum out the particles along with any dirt or dead skin.

Professional marketing support to ensure your business is a success

Whether you are a new spa or salon owner, or have years of experience, NuBody is committed to offering you the best industry education, planning and marketing support. Our complete marketing solution includes free marketing materials with your Luminous Multi-Facial Skin System purchase to increase your customers engagement, curiosity and loyalty.
